

The Golden Age of Jazz is Back

"The release of Jazz Icons is like the unearthing of a musical time capsule - an audio-visual treasure trove of music that changed the world. From Big Band and Bebop to Dixieland and Cool, it's all here and it all swings. These jazz legends, from Dizzy and Count to Louis and Ella, are the Bachs and Beethovens of our generation. From an educational standpoint this series is a gift to our culture. I'm honoured to be a featured part of it, but I'm more thrilled just to sit down and watch it with my grandkids."
